

Sector: Engineering
Area: 300sqm + demarcation & walkways
System: Flowcrete Peran SL (2mm Epoxy)
Colour: Dark Green

Quickset resin flooring Ltd were subcontracted to provide over 300sqm of a 2mm self levelling epoxy system with demarcation lines and walkways. This colourful, gloss finish, self levelling system provides a low maintenance resin floor finish while provided high chemical resistance.

The system is suitable for use in areas with high pedestrian traffic and areas where chemical resistance is a must. We fully prepared the floor by removing existing coating and treated cracks and areas of pitting. The 2mm system was installed before reinstating walkways and demarcation lines as requested. This easy to clean, smooth finish is also available with a slip resistant variant if required.

Other Standard Colours available in this system:

This system is designed:

Peran SL is suitable for use in areas with intensive pedestrian traffic such as shops, department stores, restaurants, garden centres, garages and airports.
