

Sector: Various
Area: Approx. 100sqm
System: Bespoke MMA solutions
Colour: Grey 7045

Quickset resin flooring Ltd were asked to install a bespoke MMA solution to multiple stairwells and landings. Many companies do not want to undertake such detailed works, but projects like this are no issue for us.

The concrete substrate was prepared using hand grinding equipment and vacuumed to remove all dust and debris. Area was primed using an MMA primer, a pre-filled, pre-pigmented body-coat was then roller applied to treads, risers and landings. Treads and landing areas were then fully broadcast using a coloured quartz and allowed to cure. Treads, risers and landings were then sealed twice with a clear MMA. The end result provides a durable, slip resistant solution that will last years to come.

This system is designed:

Cost effective solution for areas where slip resistance is a must. Advised for use in stairwells, lobby areas, warehousing and more.
