

Sector: Warehousing & Distribution  
Area: 5,000 sqm  
System: MMA Full Broadcast System (4mm)  
Colour: Monocolour RAL 7045

Quickset resin flooring Ltd were subcontracted to install approx. 5,000 sqm of an MMA fully broadcast system. The existing space required heavy mechanical preparation and various substrate repairs to existing concrete and terrazzo tiles. Once the substrate had been prepared and repairs completed, a full 4mm fully broadcast quartz system was installed while keeping some areas operational.

Using an MMA based system enabled the site to remain operational and reduce downtime for the business. With each process curing within 1 hour of application, large areas such as this can be completed in a short time frame.

This system is designed:

Designed for wet areas and heavy industry, for example, warehousing, distribution, food processing, bakeries, breweries, dairies, kitchens and other areas where hygiene and cleanability are paramount. The Décor system is also a perfect flooring solution for heavy engineering areas and pharmaceutical facilities.
